August 2002

Alberta International Trade Review

Executive Summary

Alberta's economy is a dynamic and growing one, with a strong focus on innovation and technology. The province's diverse economic base, including agriculture, manufacturing, and services, provides a solid foundation for continued growth. This report highlights the key findings of the Alberta International Trade Review, which examines the province's trade performance and identifies opportunities for improvement. The review finds that Alberta's trade performance is strong, with a significant increase in exports and a growing trade surplus. However, there are areas where the province can improve, such as increasing its share of total trade and diversifying its export base. The report also provides recommendations for the government and businesses to enhance Alberta's international trade performance.

About the Data

This publication provides a data source for Alberta's international trade, and is intended to provide businesses with information on current export markets.

A profile is included for each country that imported over \$10 million worth of Alberta's goods in 2001. Each profile lists the top 15 commodities Alberta exported to that country and also compares them with Canadian exports. A summary of export totals to all countries is included in Appendix B.

The trade commodity nomenclature used is the Harmonized Commodity Description and Coding System (Harmonized System or HS), adopted by Statistics Canada in 1988.

Exports by geographic region, industry, and commodity are also provided in the following sections. Industry Canada's regional groups are used. Industry groupings are based on Statistics Canada's publication on concordance between export commodity and industry classifications (see Appendix A). Whereas in previous years the industry breakdowns were based on the Standard Industrial Classification (SIC) system, in this issue the switch was made to the newer North American Industry Classification System (NAICS). As a result, the industry estimates presented in this issue of the International Trade Review are not fully comparable to the estimates presented in previous issues.

For the purposes of this publication, six-digit HS codes are presented in the country profile tables. For simplicity, some commodity descriptions accompanying these codes have been revised from their standard format. Readers requiring the exact content of a particular HS number are referred to the Customs Tariff Schedule of Canada.

Statistics Canada is the main source of information for the publication. Estimates for commercial and transportation service exports are based on special surveys conducted by Statistics Canada. The informational captions appearing at the top right corner of each country profile are from *World Factbook 2002*. The term "nes" refers to "not elsewhere specified."

The term "exports" refers to "domestic exports," goods grown, extracted or manufactured in Canada. The term includes goods of foreign origin, which have been materially transformed in Canada and then re-exported.

Unfortunately, service exports cannot be included on a country specific basis since these data are not presently available. However, these exports, including travel and tourism, have been provided in the "Year in Review" section. Throughout the remainder of this document, "exports" will refer strictly to merchandise exports.

The Year in Review

Alberta exported \$62.3 billion worth of goods and services to more than 170 countries in 2001. This total includes \$56.9 billion in commodity exports and \$5.5 billion in service exports. Exports of goods and services increased by 2.1% in 2001, from \$61.1 billion in 2000. Alberta was one of only three provinces with higher exports in 2001 than in 2000. Canadian exports of goods and services fell by 2.3% in 2001, while global exports declined by approximately 1%, as a result of the global economic slowdown and recessions in a number of major economies, such as the US and Japan.

Commodity Exports

The value of commodity exports increased by 2.8% from 2000 to \$56.9 billion in 2001. Of the 175 countries Alberta exported to, the top markets were the United States, Japan and China. The United States imported \$50.6 billion worth of goods, Japan \$1.3 billion and China \$886 million.

The increase in Alberta's exports was due largely to higher prices for natural gas and gas liquids, and to a lesser degree increased volumes of natural gas, beef, oil and gas field equipment and petrochemicals.

Growth in Alberta exports was lower than in the previous year, partly as a result of the global economic slowdown. On a global scale, the manufacturing sector was in a recession, with production of Information Technology products down sharply. This negatively affected Alberta's exports of telecommunication equipment, and also led to declines or lower growth for many other manufacturing sectors. The events of September 11 further aggravated the situation, and impacted world trade in both goods and services. After peaking in 2000 with growth of more than 12%, world trade volumes declined marginally in 2001.

Regionally, Alberta's major markets were the United States, Asia and Western Europe. The United States accounted for 88.9% of total commodity exports, Asia 6.0% and Western Europe with 1.7%. Exports to the US, Africa, and especially to Eastern Europe and Central America were higher than in 2000, while exports to Asia, Western Europe, South America, the Middle East and Oceania declined. Exports to the United States increased by 3.8% to \$50.6 billion, but fell by 4.8% to \$3.4 billion for Asia, and by 9.9% to \$1.0 billion for Western Europe.

Commodity exports can be classified into three sectors: mining and energy, primary agriculture, and manufacturing. The mining and energy sector accounted for the majority of exports at \$36.4 billion, followed by the manufacturing sector at \$16.7 billion and primary agriculture at \$3.0 billion. In 2001, exports increased for mining and energy (up 6.8%) and primary agriculture (up 11.0%), but were lower for manufacturing (down 5.9%).

Service Exports

Service exports were estimated at \$5.5 billion in 2001, a decline of 4.4% from 2000. Included in this figure are \$1.3 billion in international travel and tourism receipts and \$4.2 billion in exports of commercial and transportation services. Tourism exports declined sharply in the wake of September 11.

Unlike commodity exports, services cannot be included on a country specific basis. Therefore, unless otherwise specified, the term "export" in the remainder of this publication will refer strictly to commodities.

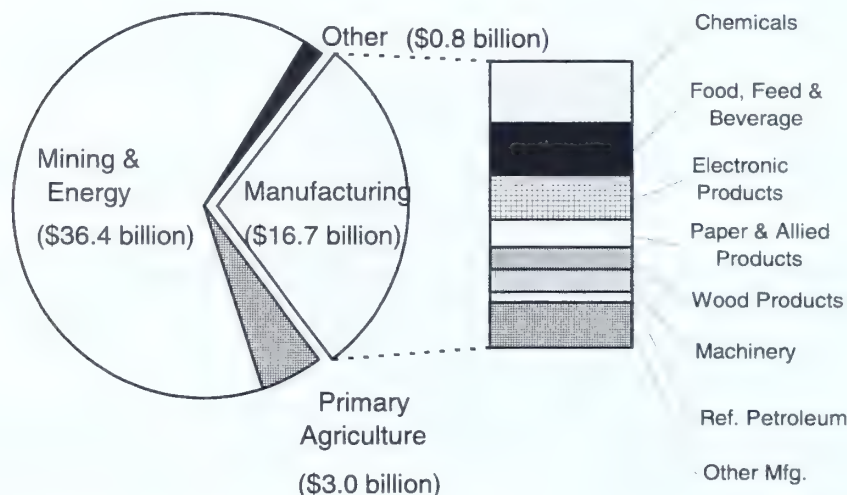

Market Influences

Some of the factors that influenced Alberta's 2001 trade include:

- weakest world economic growth since 1992, led by a recession in the US economy
- lower economic growth in all regions
- the first decline in world trade volumes since 1982
- the events of September 11
- continued weakness in Japan
- the global high tech meltdown, affecting trade in telecommunication and computer equipment
- the world-wide recession in the manufacturing industry
- higher prices for natural gas and natural gas liquids
- strong US demand for beef, electricity and petro-chemicals
- weak prices for grains and oilseeds and for forest products
- the US - Canada lumber dispute
- a stronger US currency relative to the Canadian dollar
- trend towards more local processing of Alberta beef cattle in the province

Alberta Exports by Industry and Commodity

The value of Alberta's commodity exports in 2001 was \$56.9 billion, an increase of 2.8% over 2000. The increase is due largely to stronger gas and gas liquids prices in the first part of 2001, and increased export volumes of natural gas, beef, oil and gas field equipment and petro-chemicals, especially to the U.S. The growth rate in 2001 was the second lowest of the past ten years, and was in large part the result of the global economic slowdown. The global manufacturing sector, and the Information Technology (IT) products industry in particular, were in a recession in 2001.

Alberta's exports are divided into three main sectors: mining, manufacturing and primary agriculture. The mining sector accounted for \$36.4 billion (64%) of Alberta's commodity exports. This consisted primarily of natural gas and crude petroleum at \$21.6 billion and \$12.6 billion, respectively. Mining exports were 6.8% higher than in 2000, primarily a result of very high prices for natural gas and gas liquids during the first part of 2001.

The manufacturing sector accounted for \$16.7 billion in exports, a decline of 5.9% from 2000. It was affected adversely by the recession in the global manufacturing sector. Exports of computer and electronic products (mainly telecom equipment) fell by 42%, refined petroleum products by 22% and of pulp and paper by 16%. Strong performances were recorded by food, feed and beverages (up 19%), machinery (up 40%) and transportation equipment (up 71%).

Primary agricultural exports totaled \$3.0 billion in 2001, an increase of 11%. Exports of crops and livestock rose 3.4% and 35%, respectively. Major factors for the increase in crops were higher exports of canola (up 14%) and durum wheat (up 12%), although exports of peas were down 30%. Grain exports rose mostly as a result of increased prices, while exports of peas declined because of lower volumes. Live cattle and hogs exports were 39% and 30% higher, respectively, mostly as a result of higher volumes.

Alberta Exports by Industry, 1996 to 2001

	(\$ millions)						Percent	Percent

¹ Estimate.

Agriculture, Food and Beverages

The combined export value of primary agriculture, and food and beverages (agri-foods) was \$6.0 billion in 2001. Primary agricultural exports increased by 11% to \$3.0 billion, and exports of food and beverages by 19% to \$3.0 billion. The leading agri-food exports were beef products at \$1.7 billion, wheat (including durum wheat) at \$1.2 billion, and cattle at \$713 million.

The increase in beef exports was a result of greater demand from the United States and especially from Mexico, the increased slaughtering capacity in Alberta, and higher prices. The value of beef exports increased by 20%, from \$1.4 billion to \$1.7 billion. Pork exports rose 21% to \$220 million, as prices were up sharply. Exports of vegetable fats and oils, mostly canola oil, cake and meal, fell by 11% to \$254 million, because of a very large decline in shipments to Hong Kong.

Although export volumes declined, stronger prices caused a 3% increase in the value of wheat and durum wheat exports, compared to 2000. Wheat exports to Iran, the top importer of Alberta wheat, Iraq and Algeria were sharply lower, but wheat imports by the US, Japan, Mexico and the Philippines increased strongly.

Live cattle exports to the US rose 39%, mainly because of higher volumes. Exports of canola and other oilseeds increased by 12% to \$466 million, because of higher prices and volumes, especially to China.

Alberta's Major Agricultural Exports (including Food & Beverage Manufacturing)

	2000 (\$ '000)	2001 (\$ '000)	Percent Change
Beef products	1,429,063	1,721,031	20.4%
Wheat/durum	1,192,441	1,230,824	3.2%
Cattle, live (includes bison)	513,106	712,690	38.9%
Oil seeds (canola, mustard seed, flaxseed)	415,743	465,777	12.0%
Vegetable fats & oils (e.g. canola oil & cake)	285,624	254,047	-11.1%
Pork products	181,325	219,812	21.2%
Other grains (barley, oats)	167,863	182,139	8.5%
Frozen foods (potatoes)	153,067	158,519	3.6%
Malt & flour milling	115,586	148,904	28.8%
Swine, live	92,402	123,670	33.8%
Raw hides & skins	85,296	120,810	41.6%
Peas & beans	131,792	111,019	-15.8%
Forage products (hay, alfalfa)	75,884	80,422	6.0%
Total Above	4,839,192	5,529,663	14.3%
TOTAL AGRICULTURE, FOOD & BEVERAGES	5,235,883	6,002,638	14.6%

54% of agri-food exports went to the United States (\$3.2 billion), mostly in the form of beef products (\$1.3 billion) and cattle (\$713 million). Other major agri-food markets were Japan, Mexico and China at \$793 million, \$414 million and \$297 million, respectively.

Mining

Mining exports in 2001 were valued at \$36.4 billion compared to \$34.1 billion the year before. Major factors behind this 6.8% increase were a \$4.5 billion increase in the value of natural gas, as both prices and volumes increased, and to a lesser degree a large increase in electricity exports.

The 26% increase in the value of gas exports occurred mostly because of higher prices (up 18%), especially in the first part of 2001, although volumes shipped also increased (up 7%). The 15% decrease in the value of crude oil exports occurred as a result of a combination of lower prices (down 12%) and volumes (down 4%). Petroleum gas exports rose marginally as higher prices offset lower volumes.

Exports of coal increased by 4% on the strength of higher prices. The major coal markets were Japan (\$128 million) and South Korea (\$103 million). The US also became a major importer of Alberta coal in 2001, with shipments more than doubling to \$61 million. California's electricity crisis turned Alberta into an exporter of electricity in the first half of 2001.

Alberta's Major Mining Exports

	2000 (\$ '000)	2001 (\$ '000)	Percent Change
Natural gas	17,135,916	21,638,241	26.3%
Crude petroleum	14,878,765	12,612,250	-15.2%
Petroleum gases, liquefied:	1,347,996	1,360,850	1.0%
<i>Propane, liquefied</i>	793,771	1,141,379	43.8%
<i>Butanes, liquefied</i>	173,696	121,285	-30.2%
<i>Other, liquefied</i>	380,529	98,186	-74.2%
Coal	379,432	393,203	3.6%
Electricity	6,286	203,651	n/a
Sulphur	255,745	137,523	-46.2%
Total Above	34,004,140	36,345,718	6.9%
TOTAL ALL MINING	34,058,284	36,385,566	6.8%

The majority of Alberta's mining exports went to the United States, consisting mostly of crude petroleum, natural gas and propane. Nearly 99% was imported by the United States, while the rest was imported primarily by Japan, South Korea, Brazil and China.

Manufacturing

Because of the manufacturing sector's global recession and the high tech meltdown, manufactured exports fell by 5.9% to \$16.7 billion, mostly because of lower volumes. Most of the decline was volume related. Exports of telecommunication equipment fell by more than 40% between 2000 and 2001. Yet, because of strong growth in the years prior to 2001, the telecom sector's export value is still more than double the 1996 value. Export volumes of refined petroleum also declined. Lower prices caused the export values of wood pulp and most chemicals to drop. Exports of lumber, oriented strand board (o.s.b.), beef and oil and gas field equipment increased sharply.

This sector, which accounted for 29% of all commodity exports in 2001, has seen its exports rise 70% since 1996.

Of the 15 industries that comprise this sector, eight increased their export value compared to 2000. Significant gains occurred in transportation equipment (up 71%), machinery (40%), electrical products (33%), and food, feed and beverages (19%). Exports of computer and electronic products, mostly telecom equipment, declined 42%. Other industries with significant declines include refined petroleum products (down 22%), paper and pulp (16%) and furniture (15%).

Because of the more than 40% decline in the value of telecom equipment exports, computer and electronic products dropped from being Alberta's largest sub-sector in 2000 to third largest in 2001 with exports of \$2.6 billion. The chemical industry regained the top spot with exports of \$3.8 billion, followed by food, feed and beverages with \$3.0 billion. The other sub-sectors with exports in excess of \$1 billion were paper and pulp (\$1.6 billion), wood products (\$1.3 billion) and machinery (\$1.3 billion).

Manufacturing Industries	2000 (\$ '000)	2001 (\$ '000)	Percent Change
Chemicals	3,488.3	3,751.2	7.5%
Computer & Electronic Products	4,530.3	2,611.6	-42.4%
Electrical Equipment, Appl. & Comp.	186.7	248.3	33.0%
Fabricated Metal Products	322.1	344.0	6.8%
Food, Feed, Beverages	2,532.1	3,001.8	18.6%
Furniture & Allied Products	410.1	350.0	-14.7%
Machinery (excl. Electric/Transport)	908.4	1,267.5	39.5%
Non-Metallic Mineral Products	163.8	148.5	-9.3%
Paper Products & Wood Pulp	1,877.6	1,577.4	-16.0%
Plastics	245.7	243.7	-0.8%
Primary Metal Products	434.3	451.0	3.9%
Refined Petroleum & Coal Products	805.3	627.7	-22.1%
Transportation Equipment	348.3	596.6	71.3%
Wood Products	1,310.0	1,296.8	-1.0%
Other Manufacturing	141.5	149.9	6.0%
TOTAL MANUFACTURING	17,704.3	16,666.0	-5.9%

The major manufactured commodity exports in 2001 were beef, wood pulp, telecom transmission apparatus, polyethylene and lumber. Collectively, these accounted for more than one third of all manufactured products.

Alberta's Major Manufacturing Exports

	2000 (\$ '000)	2001 (\$ '000)	Percent Change
<i>Telephone apparatus</i>	3,904,364	1,916,851	-50.9%
- Transmission apparatus	1,820,597	1,082,625	-40.5%
- Telephone switching apparatus	1,458,821	447,335	-69.3%
- Parts for telephone systems/apparatus	367,204	266,710	-27.4%

nes: not elsewhere specified

Commodities with strong growth in 2001 include:

- boneless beef (up \$261 million, or 28%)
- polyethylene (up \$223 million, or 33%)
- parts for boring or sinking machinery (up \$133 million, or 179%)
- ethylene polymers (up \$111 million, or 287%)
- parts for wireless transmission (up \$110 million, or 47%)
- trucks with a GVW in excess of 20 tons (up \$108 million, or 169%)

All of these commodities were exported primarily to the United States. China also was a large customer for Alberta's polyethylene and ethylene polymers, and parts for boring or sinking machinery were shipped to a large number of other oil and gas producing nations.

A total of \$12.7 billion of manufactured commodities was imported by the United States. This represents 76.3% of all manufacturing exports and a decline of \$0.9 billion or 6.5% from 2000, mainly because of much lower exports of telecom equipment and refined petroleum. The chemicals, food, feed and beverages, transportation equipment and machinery industries had strong export growth. The U.S.' largest three manufacturing sectors in 2001 were: chemicals (\$3.0 billion), computer and electronic products (\$2.3 billion), and food, feed and beverages (\$2.0 billion).

Other major markets were in Asia: Japan (\$755 million), China (\$581 million), and South Korea (\$322 million). Manufacturing exports to Japan were down 3%, as lower exports of wood pulp and cobalt more than offset increases for pork, malt and alfalfa meal and pellets. Exports to China increased 17%, because of large increases in exports of wood pulp and ethylene glycol. South Korean imports of manufactured goods from Alberta were nearly 28% lower in 2001 than in the previous year, because of large decreases in wood pulp, beef and styrene imports. Taiwan is also a major market for Alberta's manufacturing sector, and has increased its imports of telecom equipment substantially during the past three years. Overall, food, feed and beverages, and paper and pulp were Alberta's largest manufacturing export sectors to Asia.

Alberta's largest European Union markets for manufactured goods were: Italy (\$146 million), the United Kingdom (\$123 million), the Netherlands (\$108 million), and Germany (\$101 million). For Italy, the U.K. and the Netherlands the largest manufacturing import was nickel, and for Germany wood pulp.

Mexico's manufacturing imports from Alberta rose strongly by 59% to \$307 million, as a result of a surge in beef imports. Over the past two years, Mexico's beef imports from Alberta have more than quadrupled to over \$200 million. Other countries that also have significantly higher imports of manufactured goods include Russia and Norway (oil and gas field equipment), and Sweden (wood pulp).

Forestry, including Wood, Paper and Allied Products

Overall, forestry products totaled \$2.9 billion in 2001, a drop of 10.4% when compared to 2000. Most of the decline came from a 22% decrease in wood pulp, as a result of lower prices. Shipments of lumber were largely unchanged (-0.4%) as higher volumes offset a decline in prices. Oriented strand board (o.s.b.) exports fell, mainly because of lower prices, and newsprint shipments rose on the strength of higher prices.

Alberta's Major Forestry Exports
(includes Wood, Paper and Allied Products)

	2000 (\$ '000)	2001 (\$ '000)	Percent Change
Wood pulp	1,672,001	1,307,434	-21.8%
Lumber	691,736	688,945	-0.4%
Oriented strand board	392,342	345,146	-12.0%
Newsprint	140,593	195,288	38.9%
Fibreboard	45,263	56,901	25.7%
Builders' joinery and carpentry	52,533	44,596	-15.1%
Total Above	2,994,468	2,638,311	-11.9%
TOTAL ALL FORESTRY	3,216,585	2,882,760	-10.4%

The primary markets for wood pulp were the United States (\$554 million), Japan (\$207 million) and South Korea (\$172 million). Pulp exports to these three markets fell by 18%, 29% and 24%, respectively, as a result of lower prices. O.s.b. was primarily imported by the United States, accounting for about 95% of the total. Even though the US increased the volumes of o.s.b. imported, lower prices caused a decline in the value of this commodity.

The value of lumber exports fell by 0.4% in 2001, as a result of a 31% decline in lumber exports to Japan. The US, which accounts for more than 90% of Alberta lumber exports, increased lumber imports by 3.2%, as volume increases more than offset lower prices.

Major markets for forestry products were the United States (\$2.1 billion), Japan (\$272 million) and South Korea (\$173 million).

Chemicals

The value of chemical exports increased by 7.5% to \$3.8 billion, as prices and especially volumes increased. Volumes increased significantly for polyethylene, acyclic ethers and ethylene polymers. Commodities with higher prices include ethylene glycol, polyvinyl chloride, styrene and urea.

Although prices were lower in 2001, the value of polyethylene, Alberta's largest chemical export, increased by 33% to \$893 million because of higher volumes. The value of polyethylene exports to the United States rose 72% to \$780 million as a result of higher demand, especially in Connecticut. Exports to China fell 40% to \$75 million.

Exports of acyclic ethers advanced 22% to \$482 million, as volumes increased by about 28%. All of these exports were destined for the U.S.

Styrene exports declined by 10% in 2001 to \$462 million, because of lower volumes. Shipments to the U.S., the only market for Alberta styrene in 2001, fell by less than one percent. Styrene was exported to South Korea, Singapore and Taiwan in 2000, but no exports were reported for 2001.

Alberta's Major Chemicals Exports

	2000 (\$ '000)	2001 (\$ '000)	Percent Change
Polyethylene	670,403	893,890	33.3%
Acyclic ethers	395,728	482,275	21.9%
Styrene	515,519	461,567	-10.5%
Ethylene glycol	405,607	436,049	7.5%
Urea	359,425	244,687	-31.9%
Anhydrous ammonia	197,181	183,092	-7.1%
Polymers of ethylene, nes	38,881	150,328	286.6%
Artificial filament tow	141,247	144,532	2.3%
Ethylene-vinyl acetate copolymers	114,231	104,863	-8.2%
Polyvinyl chloride	46,915	93,282	98.8%
Methanol	63,714	60,614	-4.9%
Total Above	2,948,851	3,255,179	10.4%
TOTAL ALL CHEMICALS	3,488,262	3,751,188	7.5%

Exports of ethylene glycol rose 8% to \$436 million, as exports to China increased by 26% to \$209 million and to the US by 72% to \$120 million. Exports of urea, all of which is sent to the US, fell 32% to \$245 million, as volumes dropped by 41%.

Major markets for chemicals were the United States (\$3.0 billion), China (\$404 million), South Korea (\$73 million) and Taiwan (\$45 million).

Computer and Electronic Products

Because of the global high tech meltdown, Alberta's exports by the computer and electronic products industry, mostly telecom equipment, fell by 42% in 2001 to \$2.6 billion, from \$4.5 billion in 2000. Despite the sharp decline in 2001, Alberta's exports of computer and electronic equipment have more than doubled since 1996.

Exports of telephone apparatus fell by more than one-half to \$1.9 billion, because of lower US demand. Wireless communication equipment exports rose 47% to \$368 million, as the US increased its imports by one-half. Exports of navigational, measuring and control apparatus (e.g. surveying instruments and gas or smoke analysis apparatus) rose 32% to \$212 million, also because of increased US demand.

The United States accounted for \$2.3 billion or 87% of Alberta's computer and electronic product exports, with more than half going to the state of New York. Other major destinations include Taiwan with \$58 million, the UK with \$32 million and Hong Kong with \$31 million.

Alberta's Major Computer & Electronic Product Exports			
	2000 (\$ '000)	2001 (\$ '000)	Percent Change
Telephone apparatus	3,904,364	1,916,851	-50.9%
<i>Transmission apparatus</i>	1,820,597	1,082,625	-40.5%

Total Above	4,486,552	2,582,981	-42.4%
TOTAL ALL COMPUTER & ELECTRONIC PRODUCTS	4,530,342	2,611,608	-42.4%

Machinery

In 2001, exports of machinery products grew strongly for the second year in a row. Last year, they were 40% higher than in 2000 at \$1.3 billion, mostly as a result of strong demand for oil and gas field equipment. Exports to the U.S. increased by 29% to \$752 million, mainly because of strong growth in exports of air and gas compressors and pumps and of parts for boring and sinking machinery. In 2001, exports of machinery to Russia rose strongly to \$68 million, while exports to Venezuela increased marginally to \$43 million, both as a result of higher sales of oil and gas field equipment.

Exports of oil and gas field machinery, mainly boring and sinking machinery and parts thereof, increased 77% to \$313 million, mostly as a result of strong demand growth in the US, Yemen, Venezuela and Mexico. Exports of pumps and compressors, also used by the oil and gas sector, more than doubled to \$212 million, because of large gains in the US and China. Although exports to Russia more than doubled, lower demand in the US and Venezuela resulted in exports of other industrial machinery, much of which is also energy related, to drop by 7%.

The United States accounted for 59% of machinery exports, down from 64% in 2000, as most other major markets posted stronger growth. Besides Russia and Venezuela, other markets also include China, Yemen, the United Kingdom, Singapore, Norway, Mexico, the United Arab Emirates and Kazakhstan (each importing more than \$15 million).

Alberta's Major Machinery Exports			
	2000 (\$ '000)	2001 (\$ '000)	Percent Change
Oil and gas field machinery	177,029	313,308	77.0%
<i>Parts for boring or sinking machinery</i>	74,238	207,285	179.2%
Pumps and compressors	100,659	212,261	110.9%

TOTAL ALL MACHINERY	908,355	1,267,499	39.5%

Refined Petroleum & Coal Products

Exports of refined petroleum and coal products were valued at \$628 million, a decline of 22% from 2000. This decrease was the result of both lower prices and lower volumes.

Petroleum oils (such as diesel fuel and fuel oil) accounted for 75% of the industry's total exports. The United States accounted for 99.9% of all refined petroleum and coal product exports.

Alberta's Major Refined Petroleum & Coal Products			
	2000 (\$ '000)	2001 (\$ '000)	Percent Change
Petroleum oils, e.g. diesel fuel and fuel oil	656,679	468,588	-28.6%

Articles of asphalt, nes	3,960	11,524	191.0%
Total Above	783,539	562,970	-28.2%
TOTAL REFINED PETROLEUM & COAL PRODUCTS	805,276	627,674	-22.1%

Alberta Exports by Country

Making up 88.9% of Alberta's exports in 2001, the United States (US) is Alberta's largest export market. Exports worth \$50.6 billion were shipped from the province to the US in 2001, up 3.8% from the year prior. Fueling much of this growth was higher natural gas sales, which benefited from higher prices in 2001, and more than offset the decline in oil exports.

Canadian exports to the U.S. dropped by 2.7% in 2001, as shipments of motor vehicles and parts - the country's largest export sector - declined along with forestry, computer and telecom shipments. Alberta, Nova Scotia and New Brunswick bucked the trend in 2001, being the only provinces to register positive export growth to the US. By outperforming the nation in exports for the third year in a row in 2001, Alberta improved its share of total Canadian exports by one percentage point to 15.6%.

Alberta's Ten Largest Export Markets

	2000 (\$'000's)	% of Total	2001 (\$'000's)	% of Total	% Change 2000/01
United States	48,731,981	88.1%	50,565,744	88.9%	3.8%
Japan	1,340,936	2.4%	1,283,842	2.3%	-4.3%
China	771,422	1.4%	886,476	1.6%	14.9%
Mexico	356,051	0.6%	481,484	0.8%	35.2%
Korea, South	567,391	1.0%	462,226	0.8%	-18.5%
Taiwan	235,541	0.4%	210,982	0.4%	-10.4%
United Kingdom	198,325	0.4%	176,280	0.3%	-11.1%
Italy	192,429	0.3%	174,934	0.3%	-9.1%
Iran	203,311	0.4%	162,783	0.3%	-19.9%
Belgium	153,204	0.3%	119,392	0.2%	-22.1%
Total Above	52,750,590	95.3%	54,524,144	95.9%	3.4%
Total All Countries	55,331,452	100.0%	56,864,491	100.0%	2.8%

While the value of Alberta exports to the US grew in 2001, the province's shipments to the rest of the world declined by 4.6%, partly reversing last year's gain of 19%. Lower exports of wood pulp and other products, such as computer and telecom equipment, organic chemicals and plastics contributed mainly to the decline, more than offsetting the increases in wheat, barley, beef and pork, and oil and gas field equipment.

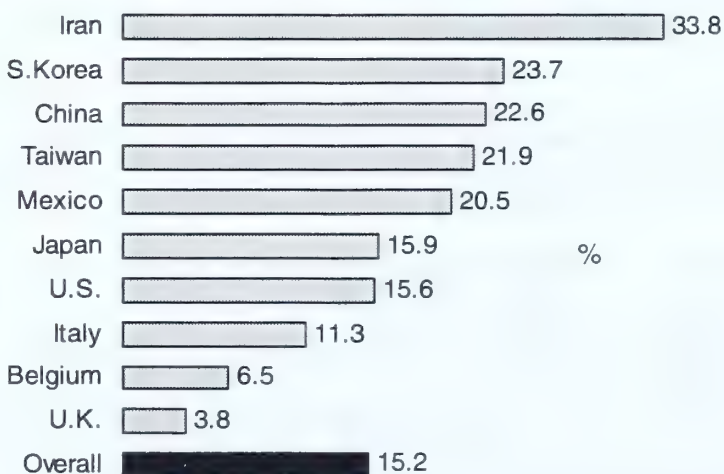

Most of Alberta's largest non-US markets reduced their imports of Alberta goods in 2001, although there was strong export growth to NAFTA partner Mexico and to China, one of the world's fastest growing economies.

- With **Japan** still mired in a recession, Alberta exports to the country remained weak, falling 4.3% to \$1.3 billion in 2001. Nevertheless, Japan remained Alberta's second largest market.
- Strong export growth to **China** continued in 2001, reaching 15% following a near 40% upswing in 2000. With exports valued at \$886 million, China was Alberta's third largest market for the fourth straight year.

- On the strength of higher beef shipments, **Mexico**, another fast growing market for Alberta goods, increased its imports by 35% to \$481 million in 2001, pushing the country ahead of South Korea as Alberta's fourth largest market.
- Following strong gains in 2000, **South Korea** reduced its Alberta imports by 19% to \$462 million in 2001.
- **Taiwan** imported \$211 million worth of Alberta goods in 2001, a 10% decline from the year prior.
- The **United Kingdom** remained Alberta's seventh largest market in 2001, despite reducing its Alberta imports by 11% to \$176 million.
- Nearly \$175 million in Alberta exports were shipped to **Italy** in 2001, 9% less than in 2000.
- Exports to **Iran** dropped by 20% to \$163 million in 2001, led by lower shipments of wheat.
- Although exports to **Belgium** fell by 22% to \$119 million, the country became one of Alberta's top ten markets for the first time since 1996, mostly because of a sharp reduction in exports to Hong Kong and Germany.

Among Alberta's top ten markets, Iran had the largest share of its Canadian imports originating from Alberta in 2001.

Alberta's Share of Canadian Exports Top 10 Alberta Markets - 2001

Alberta Exports by Non-U.S. Region

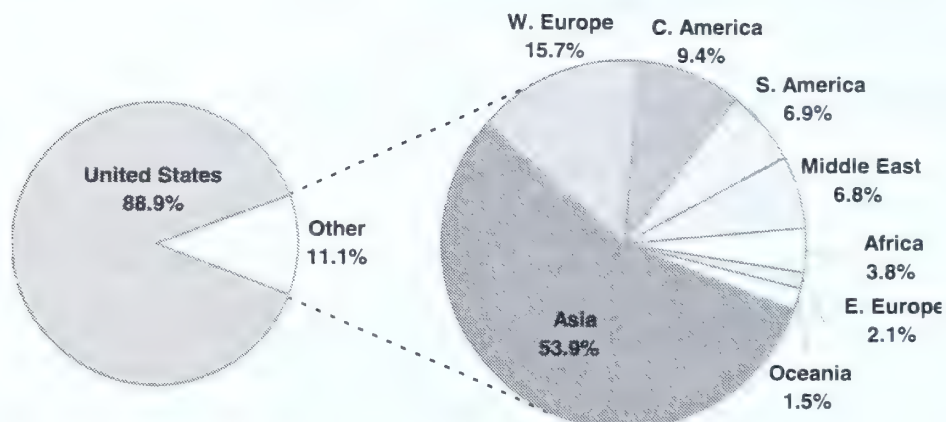

Alberta's export performance in 2001 varied considerably by region. Exports were up in Eastern Europe and Central Europe and, to a lesser extent, in the US and Africa. However, they were down in all other regions, most significantly in Oceania and South America.

- **Asia**, hit especially hard by the global economic slowdown, reduced its Alberta imports by 4.8% to \$3.4 billion in 2001. Asia is Alberta's second largest regional market, accounting for 6.0% of the province's exports.
- **Western Europe** was the destination for another 1.7% or \$988 million of Alberta's exports in 2001, a 9.9% decline from the previous year.
- **Central America**, consisting primarily of Mexico, replaced South America as Alberta's fourth largest regional market in 2001. Exports to the region rose by 21% to \$592 million - the largest increase of all regions.
- Exports to **South America** were down by 17% to \$435 million in 2001, with particularly large declines in Argentina and Chile.
- The **Middle East** took in \$426 million worth of Alberta goods in 2001, a level very similar to the previous year.
- Exports to **Africa** also held fairly steady at \$241 million in 2001.
- **Eastern Europe** continues to be one of Alberta's fastest growing regional markets; exports to the region increased for the second straight year, by 18% to \$132 million.
- Lower export levels to Australia caused the value of Alberta's exports to **Oceania** to fall 36% to \$92.3 million.

Alberta's Exports by Region

	2000 (\$'000's)	% of Total	2001 (\$'000's)	% of Total	% Change 2000/01
United States	48,731,981	88.1%	50,565,744	88.9%	3.8%
Asia	3,566,337	6.4%	3,393,464	6.0%	-4.8%

Total Exports	55,331,452	100.0%	56,864,491	100.0%	2.8%

Asia accounts for the largest share of Alberta exports to regions outside the US

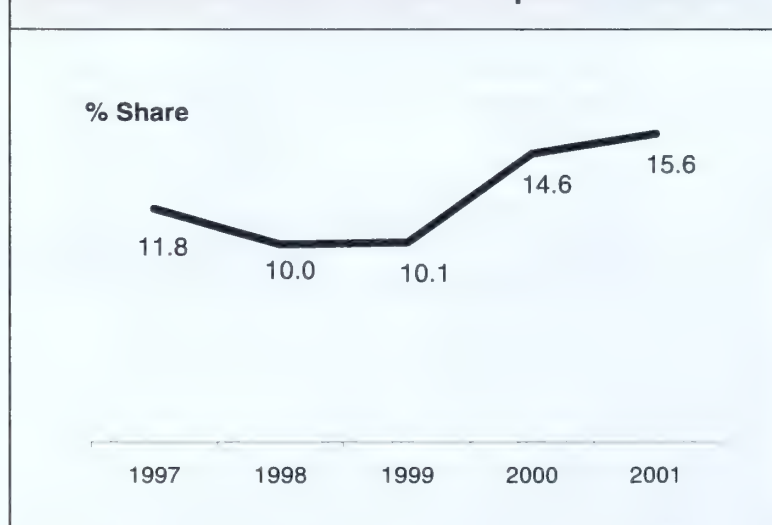

United States of America

Alberta was affected by lower demand south of the border in 2001 as the US economy entered a minor recession and reduced its total import volumes by 2.7%.

Overall, Alberta's exports to the United States climbed 3.8% to \$50.6 billion in 2001, a weakening from the very strong increase of 68% in 2000, but still stronger than Alberta's export performance to the rest of the world. As a result, a larger proportion (88.9%) of Alberta's exports went to the US last year, up from 88.1% from the year prior. Since 1997 US bound exports have grown 88% compared to a 3.6% decline in non-US exports.

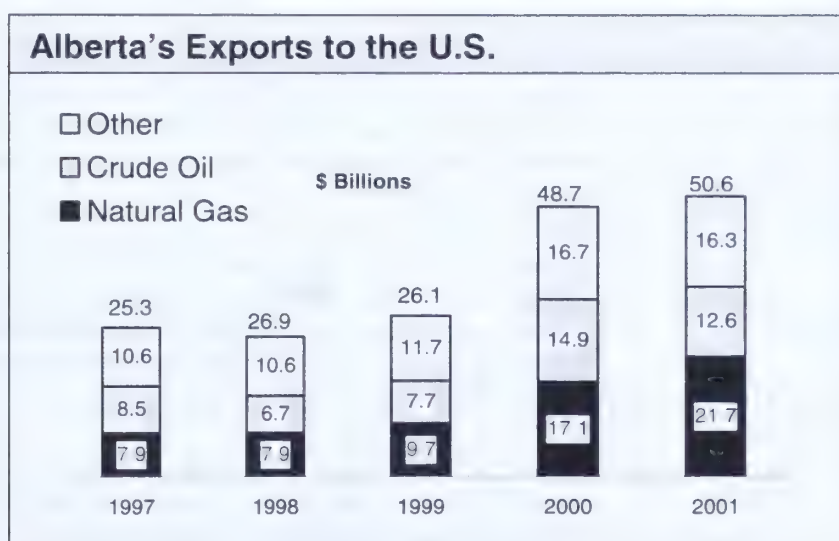

Through its rapid expansion into the US market, Alberta has been able to increase its share of Canadian exports to the US. Driven largely by energy sales, particularly natural gas, Alberta's market share of Canadian exports to the US reached 15.6% in 2001, up from 14.6% in 2000 and from 11.8% in 1997.

Alberta's Share of Canadian Exports to the US

Of all commodities shipped from Alberta, the US spends the most on natural gas. About \$21.6 billion worth of natural gas flowed from Alberta to the US in 2001, up 27% from the year prior. Providing the largest boosts were higher natural gas prices, rising 19% over the year and the opening of the Alliance pipeline in December 2000, which contributed to about a 6% increase in volumes. With the province benefiting from additional pipeline capacity and an upward trend in prices, natural gas has been the main driving force behind Alberta's exports to the US over the last five years. In 1998, natural gas surpassed crude oil as Alberta's top export to the US.

Lower prices and, to a lesser extent, lower volumes caused Alberta's crude oil exports to fall by 15% in 2001, partly reversing a strong, but primarily price driven increase of 94% in 2000. Crude oil exports to the US have grown by nearly 50% over the last five years, a sizable increase, but lower than the 175% growth in natural gas shipments.

Of Alberta's largest exports to the US, some of the commodities that grew strongly in 2001 were:

- Propane, up 44% to \$1.1 billion because of stronger prices and volumes.
- Polyethylene became one of Alberta's largest exports to the US after soaring 72% to \$780 million in 2001.
- Exports of electricity, while not one of Alberta's largest shipments to the US, grew to \$204 million from \$6.3 million in 2000 as California attempted to overcome electricity shortages stemming from its recent deregulation of the industry.
- Exports of cattle increased 39% to \$713 million, while boneless beef exports grew 22% to \$968 million.

At the same time, many of Alberta's top commodity exports to the US were falling. Affected by the global slowdown in the technology sector, exports of telecom equipment to the US plummeted 43% to \$2.3 billion. The largest component, radio-telephone transmission equipment, fell 39% to \$1.1 billion, while telephone switching equipment sank 71% to \$423 million. Forestry exports, most notably chemical wood pulp and oriented strand board, were also down in 2001, mainly because of lower prices.

Top U.S. States

In this section Alberta exports to major states in the U.S are discussed. Since energy exports, such as crude oil and natural gas, cannot be allocated to the state of final destination, they are not included in the state export totals. Appendix D shows a breakdown of exports by state including energy commodities.

Excluding energy exports, Alberta's five largest trading partners in 2001 were:

"In the Pacific Northwest US, Alberta exports of petrochemicals, transportation equipment, industrial equipment, prefabricated buildings and agri-food continued to show strength in 2001".

Wes Sawatzky
Alberta Portland
Office

- **California.** Exports to California were up by 1.8% to \$1.8 billion in 2001. Strong gains were posted by organic chemical exports, mainly Methyl Tertiary-Butyl Ether (MTBE), which rose 26% to \$498 million, and electricity, which reached \$70 million, up from less than \$1,000 in 2000. However, this was offset by telecom equipment, which is typically a large export to the state, but fell sharply from about \$350 million to \$80 million in 2001. Other major exports include beef, oriented strand board and cattle.
- **Texas.** The state imported \$1.3 billion worth of goods from Alberta, down 2.3% from 2000. Styrene accounted for \$318 million of the total, making it the largest export to the region. Oil and gas field equipment, telecom equipment, lumber and beef are other major shipments to the state.
- **New York.** Exports to New York fell 63% to \$945 million, mainly because of a sharp decline in telecom exports. In particular, transmission equipment fell 57% to \$367 million and switching equipment 82% to \$232 million. New York also imports large quantities of furniture and beef from Alberta.
- **Washington.** In 2001, exports to Washington fell 1.4% to \$851 million. A decline in beef and cattle shipments offset the sharp increase in electricity exports, most of which was destined to California. The top exports to the region were cattle, beef, oriented stranded board and plastics.
- **Illinois** increased its Alberta imports by 10% to \$813 billion in 2001, driven mainly by higher shipments of organic chemicals, such as styrene and ethylene glycol. Other exports to the state include furniture, plastics, lumber and beef.

Asia

Alberta's second largest regional market suffered an economic slowdown in 2001 as Japan remained in recession and as several export-dependant countries in East Asia were hit by lower external demand, particularly for ICT equipment from the US.

Following a 14% increase in 2000, Alberta's exports to Asia dropped 4.8% to \$3.4 billion in 2001, mainly because of a decline in major exports such as forestry products, which suffered from lower pulp prices, and coal. Over the last five years, exports to the region have shrunk 8.4%.

"Weak business sentiment and slower re-exports to China caused a dramatic decline in Alberta's 2001 exports to Hong Kong, notably in canola and artificial filament tow."

"There is a trend for more Alberta manufactured and processed exports to Hong Kong."

Josephine Choi
Alberta Hong Kong
Office

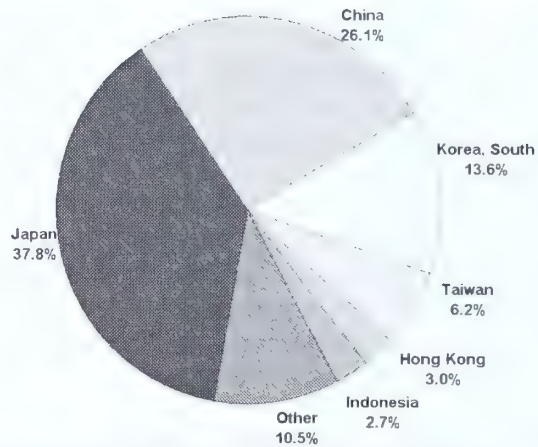

Shipments to Japan fell 4.3% to \$1.3 billion – the lowest level since 1993. In addition, all the Newly Industrialized Countries (NIC's) – South Korea, Hong Kong, Taiwan and Singapore – reduced their imports of Alberta goods, with declines ranging from 36% in Hong Kong to 2.4% in Taiwan. Many other large Asian countries, including Indonesia, Malaysia and India, also imported less from Alberta in 2001.

But not all Asian countries reduced their Alberta imports in 2001. In the Philippines and Thailand, Alberta exports grew by about one-quarter. In China, where unlike most Asian countries economic growth was strong, imports from Alberta advanced by 15% to \$886 million. China has emerged as Alberta's fastest growing market in Asia, with exports more than doubling over the last five years. The country now ranks as the province's third largest trading partner.

Alberta Exports to Asia, 2001

Total Exports: \$3.4 billion

Japan

"Japan has declining self-sufficiency in its agricultural sector.... the Alberta Japan Office believes that there will be strong demand for agri-food products from Alberta"

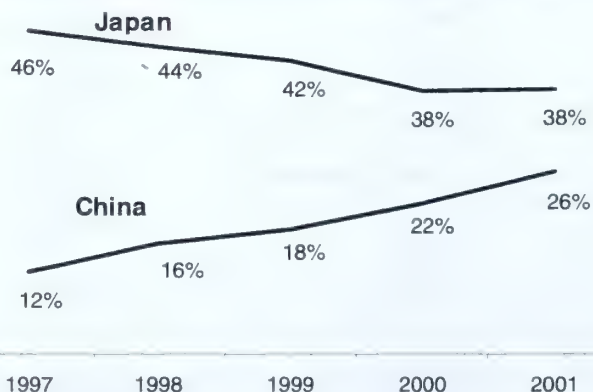

"There is increasing pressures for Japan to continue to open its markets to the world, through W.T.O. negotiations. This presents a good opportunity for Alberta companies."

Brad Klak
Alberta Japan
Office

Japan is Alberta's largest market in Asia, accounting for 38% of the province's exports to the region. Alberta's sales to Japan reached \$1.3 billion in 2001, a 4.3% decline from the year prior. This compares to a 11% drop in Canadian exports over the same period.

In recent years, exports to Japan have been stagnant or declining, in large part because the country has been mired in a recession since the early 1990's. Exports are only slightly above 1993 levels and are down by one-quarter over the last five years. In 1997, Japan accounted for 46% of Alberta exports to Asia; in 2001, its share dropped to 38%. Although Japan is still Alberta's largest market in Asia, China has recently emerged as a serious challenger for the top spot.

Share of Alberta's Exports to Asia - Japan and China

Canola was Alberta's largest export to Japan, accounting for 14.8% of total exports. Because of higher prices, which more than made up for lower volumes, exports of this commodity grew by 5.4% to \$190 million in 2001.

Non-coniferous (hardwood) chemical wood pulp is Japan's second largest import from Alberta, with shipments totaling \$133 million in 2001. While volumes were unchanged, a steep drop in prices caused a 25% decline in exports of this commodity in 2001.

Other major exports to Japan include coal (\$128 million), wheat (\$107 million) and malt (\$71 million).

China

"In 2001, China became a member of the WTO World Trade Organization... the world now awaits the actual implementation of new tariffs and more transparent trade regulations".

David Wong
Alberta China
Office

Alberta exports to China expanded for the fourth straight year in 2001, reaching \$886 million, a 15% increase from 2000. China ranks as Alberta's third largest overall export market, surpassing South Korea in 1997, and Canada's fourth largest market, behind the U.S., Japan and the U.K. Canadian exports to China were also strong in 2001, climbing 20% during the year, led by a jump in aircraft shipments.

Over the past five years, Alberta has seen its exports to China more than double (+104%), with stronger canola, ethylene glycol, sulphur and wood pulp shipments leading the way.

Ethylene glycol worth \$209 million accounted for almost a quarter (23%) of Alberta's exports to China in 2001. Up 26% from 2000 because of higher volumes, this commodity has been Alberta's top export to China for the last two years.

Canola accounts for another 15% of the province's exports to China. Valued at \$129 million, canola shipments were up 27% from the previous year, due to higher volumes. This commodity, which was not exported in 1997, represents the fastest growing Alberta export to China over the past five years.

Exports of artificial filament, used for cigarette filters, were down by 4.5% to \$90 million in 2001, while barley exports rose by 86% to \$70 million, driven up by much stronger volumes and slightly higher prices. Other major exports to China included polyethylene (\$59 million), wheat (\$47 million), sulphur (\$41 million) and semi-chemical wood pulp (\$41 million).

South Korea

"With the Korean economy expecting growth of about 5%, 2002 promises to be very encouraging year for Alberta exporters".

"Expansion plans for Korea's infrastructure will provide opportunities in the telecom, transportation, energy, health and environment sectors".

Cliff Wulff
Alberta Korea
Office

South Korea ranked as Alberta's fifth largest market in 2001. This Asian Pacific country saw its Alberta imports decline by 19% in 2001 to \$462 million - the lowest level since 1998. For Canada, where South Korea is the eighth largest market, exports fell by 13%

Contributing to Alberta's 2001 decline was a price driven 21% drop in non-coniferous (hardwood) chemical wood pulp exports, the top export to the region. Other factors included a volume related 17% reduction in ethylene glycol shipments and a 40% decrease in semi chemical wood pulp sales (lower prices). Exports of these three commodities were valued at \$128 million, \$63 million and \$25 million, respectively.

Of Alberta's top exports to the South Korea, only the value of coal shipments increased, by a substantial 30% to \$103 million in 2001, due to much higher quantities shipped.

Alberta exports to South Korea have dropped 14% over the last five years, largely because styrene and canola shipments fell to zero in 2001 after equaling \$68 million and \$59 million, respectively, in 1997.

Based on 2001 figures, paper and pulp and mineral fuels, particularly coal, make up about 60% of Alberta's exports to South Korea. Exports of ethylene glycol, beef and wheat account for another 25%.

Taiwan

"With over 90% of Taiwanese owning a mobile phone, wireless communication is one of Taiwan's hottest economic sectors. Opportunities also exist in the biotechnology and opto-electronics sectors."

Li-an Chen
Alberta Taiwan
Office

Taiwan makes up Alberta's sixth largest market. In 2001 exports to Taiwan fell 10% to \$211 million because of much lower ethylene glycol and semi-chemical wood pulp sales. At the same time, exports from Canada dropped 14% to \$965 million.

Over the last five years, Taiwan has seen its Alberta imports drop nearly one-quarter (24%) as large declines in petrochemical shipments (e.g. ethylene glycol) more than offset higher telecom equipment sales.

Major exports to Taiwan include petrochemicals, wood pulp, telecom equipment, and hides and skins.

Ethylene glycol, valued at \$34 million in 2001, remains Alberta's top export to Taiwan, although shipments of the commodity have dropped 64% over the last five years and by 31% last year. Lower volumes are entirely responsible for these declines, as prices increased over these periods.

Bovine hides and skins became the second largest export, with shipments increasing 48% to \$27 million. Exports of telephone sets, rising for the sixth straight year by 30% to \$26 million, comprised the third largest commodity, followed by coniferous (softwood) chemical wood pulp at \$18 million, up 1.8% from 2000.

Western Europe

Affected by lower exports, higher oil prices and weaker consumer demand, economic growth slowed across Western Europe in 2001. Germany was the first European country to enter a recession, followed by a number of smaller countries such as Finland, Belgium and Denmark. While many other countries experienced an economic slowdown, they managed to escape a recession.

Alberta exports to the region totaled \$176 million in 2001, a drop of 9.9% from 2000 levels. The latest decline follows a 13% increase in 2000, when Alberta exports benefited from a jump in wood pulp and nickel exports. In 2001, it was the reverse: falling prices and volumes brought down wood pulp shipments while nickel exports suffered from lower prices.

Among the major Western European markets, only the Netherlands spent more on Alberta goods in 2001 compared to 2000. Exports to the United Kingdom, Alberta's largest market in the region, dropped 11%, while those to Italy, Belgium, Germany and France slipped 9%, 22%, 29% and 11%, respectively.

Over the last five years, Alberta exports to Western Europe have fallen by a modest 2.8%, due mainly to especially large declines in Germany and the Netherlands. The extent of the drop was limited by stronger exports to the United Kingdom, Italy, Belgium and especially to France, where exports nearly doubled.

"Despite recent export declines, Germany is still a major market for Alberta".

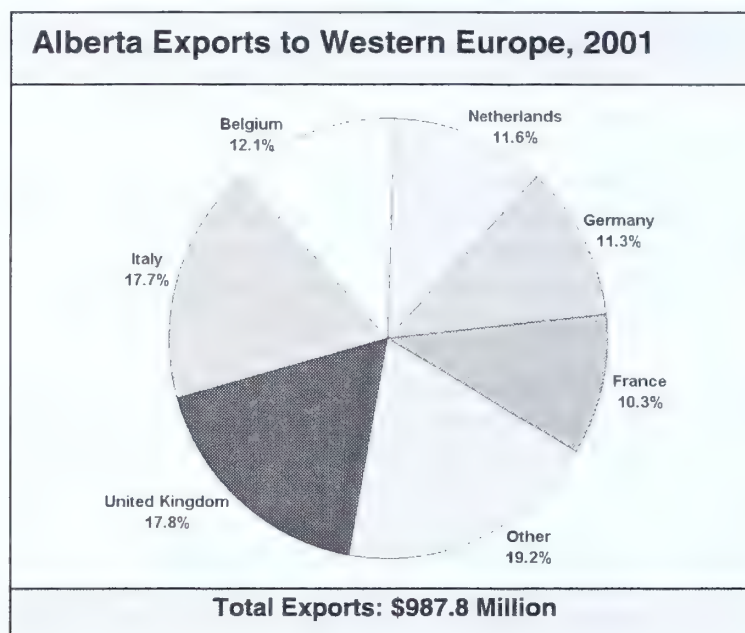

"The recent opening of the Alberta Government Office in Munich during Team Canada has dramatically increased the awareness of Alberta in Germany".

Karin Teubert
Alberta Germany
Office

Total Western Europe	1,016,114	1,077,557	972,425	1,095,754	987,797

United Kingdom

The U.K. is Alberta's largest market in Western Europe and seventh largest overall. In 2001, the province shipped \$176.3 million worth of goods to the U.K., 9.2% less than in 2000 - mainly because of a reduction in telecom equipment and wood pulp shipments. The U.K. ranks as Canada's third largest market, with exports totaling \$4.7 billion in 2001 - down 13% from the previous year.

Influenced by a surge in nickel exports, the total value of shipments to the U.K. from Alberta has risen by 6.3% over the last five years.

Alberta's top exports to the U.K. in 2001 include nickel (\$33 million), wheat (\$31 million), coal (\$16 million) and engine and motor parts (\$7.5 million). Together, these commodities accounted for nearly half of the province's exports to the U.K. Other major categories, based on broader product groupings, include telecom equipment, machinery and wood pulp.

Nickel emerged as Alberta's largest export to the U.K. in 2001, increasing 66% because of higher volumes and replacing wheat in the top spot. Wheat exports were slightly higher (+4.8%), as were exports of coal (+8.7%). But these gains were more than offset by sharp reductions in semi chemical wood pulp and telecom equipment sales, down 79% and 51% respectively.

Italy

In 2001, Alberta's exports to Italy dropped 9.1% to \$175 million. Making up 18% of exports to the region, Italy is Alberta's eighth largest market. Canadian exports to the country fell by a slightly lower 7.6% during the same period.

Although Alberta usually exports proportionally less to Western Europe than the rest of Canada does, Italy is an exception: in 2001, 11% of Canadian exports to this country originated from Alberta – the highest share of all major markets in the region.

Despite 2001's decline, Alberta exports to Italy are up 11% over the last five years, a result of higher exports of turbo propellers and nickel.

Turbo propellers have recently become Alberta's second largest export to Italy. Before 2000 no propellers were being sent to Italy from Alberta, but in 2001, \$28 million worth of the commodity was sold, up from \$6.7 million in 2000.

Nickel exports remained the highest valued shipment to Italy, despite declining 40% in 2001, a result of much lower volumes. In that year, the commodity accounted for 28% of Alberta exports to Italy. Up until 2001, nickel was a fast growing export to Italy, with sales growing for four straight years.

Other significant exports to Italy in 2001 include non-coniferous (hardwood) chemical wood pulp at \$27 million, and durum wheat, which nearly tripled in value to \$17 million from the previous year.

Belgium

Alberta shipments to Belgium declined 22% in 2001, but the country surpassed Germany to become the province's third largest market in the region and tenth largest overall. With shipments totaling \$119 million in 2001, Belgium received 12% of the province's exports to Western Europe. Nationally, exports to Belgium fell by 12%.

Driven primarily by stronger nickel and wood pulp shipments, Alberta exports to Belgium have strengthened by 7% since 1997.

As with many other countries in the region, nickel is Alberta's top export to Belgium. Valued at \$26 million in 2001, nickel sales have nearly doubled over the last five years, although they dropped 28% during 2001 because of lower prices.

Lower prices dragged down non-coniferous (hardwood) chemical wood pulp exports by 34% to \$25 million in 2001, but exports of this commodity have also nearly doubled over the last five years.

Cobalt (\$12 million), artificial filament tow (\$8 million) and dried peas (\$7 million) were other major exports to the country in 2001.

Central America, Mexico and the Caribbean

The Central American region, which includes the Caribbean and NAFTA partner Mexico, suffered severely from the US slowdown, as both exports and remittance payments to the region plunged. Following an extended period of strong economic growth, Mexico entered a recession in 2001, with output declining 0.3%. Reduced tourism spending, particularly in the Caribbean, also plagued the region in the latter part of the year.

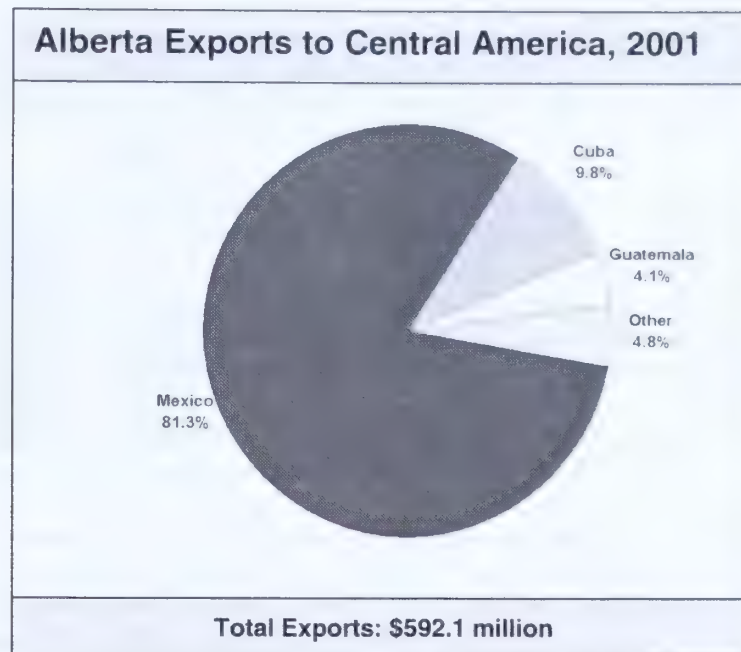

Benefiting entirely from the continued strength in Mexico, Alberta exports to Central America advanced 21% to \$592 million in 2001, the highest growth rate of all regions.

Over the last five years exports to this region have climbed 76%, as very strong export growth to Mexico more than made up for lower exports to the rest of the region.

Mexico continued to increase its imports of Alberta goods in 2001, despite the country's economic slowdown and its overall reduction in imports. Alberta exports to the country climbed sharply to \$481.5 million, as the value of shipped beef – Alberta's largest export to Mexico – continued to expand. In 2001, Mexico accounted for just over 80% of Alberta's exports to the region.

Mexico

Mexico is Alberta's largest market in Central America, accounting for 81% of exports to the region in 2001. Along with China, it is the province's fastest growing major markets. Exports reached \$481 million, an increase of 36% from 2000, compared to a 21% rise in Canadian sales.

Exports have more than doubled (+116%) over the last five years and more than tripled since 1994, when the North American Free Trade Agreement (NAFTA) gave Alberta better access to Mexican markets.

Beef, especially boneless beef, has been the key driver behind Alberta's strong export performance to Mexico. Only five years ago, beef sales accounted for just 2.4% of the province's exports to Mexico. Today, they amount to almost half of the shipments to the country. Boneless beef exports alone shot up to \$178 million in 2001, an 82% increase from the previous year and up substantially from \$0.4 million in 1997.

Canola and wheat are the second and third largest commodities sent to Mexico, collectively accounting for 34% of Alberta exports. Higher prices pushed canola exports up 10% to \$84 million, while wheat shipments rose 22% to \$81 million because of both higher prices and quantities.

Cuba

Cuba accounts for the second largest share of Alberta exports to the region, at 9.8% in 2001. For the third straight year, exports to Cuba grew, by 4.6% to \$57.9 million, compared to a 13% climb in national exports. However, over the last five years, provincial sales to the country have dropped by 13%, owing to gradually declining sulphur and dried pea exports.

Major exports to Cuba include oil and gas field equipment, sulphur, wheat and peas - together accounting for about two-thirds of the total in 2001.

Oil and gas field equipment made up the largest component of exports to Cuba. In particular, parts for boring or sinking machinery reached \$4.4 million, up from \$1.3 million in 2000.

Sulphur exports, which suffered a 33% price related decline, totaled \$12 million. Wheat was largely unchanged at \$8.5 million, while shipments of dried peas rebounded sharply, more than doubling to \$4.5 million.

South America

World trade with South America in 2001 was highly affected by instabilities in the region, most notably in Argentina, where a forced currency devaluation prompted an economic crisis. Other countries in the region experienced slowdowns, including Chile, which felt some spillover affects from Argentina, and Brazil, where a power shortage limited industrial production.

Of all regions, South America saw the largest decline in Alberta's exports in 2001, moving down one spot to become Alberta's fifth largest regional market.

Overall exports to the region were down 17% to \$435 million in 2001, mainly because of declines in three countries: In Argentina exports plummeted 72%, while those to Chile and Brazil dropped by 47% and 21%, respectively.

Despite 2001's decline, Alberta exports to South America remained almost unchanged (+1.8%) over the last five years.

After increasing its Alberta imports for the fifth consecutive year, Venezuela became the province's top market in South America in 2001. The country leads with 27% of Alberta's regional exports, followed by Brazil (22%), Colombia (15%) and Chile (14%).

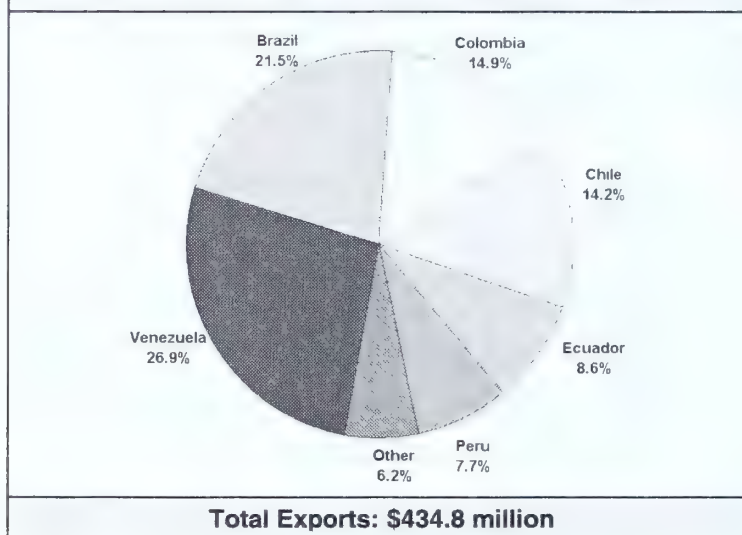

Major exports to the region include oil and gas field equipment, sulphur, coal and wheat.

Alberta Exports to South America, 2001

Venezuela

Alberta's exports to Venezuela reached \$117 million in 2001, a 5.4% increase from the year prior, compared to 12% growth in Canadian exports. Venezuela, one of the few major South American countries to increase its Alberta imports, surpassed Brazil to become Alberta's largest market in the region.

Robust growth in oil and gas field equipment exports coupled with strength in wheat sales, has made Venezuela one of Alberta's fastest growing markets in South America, with exports surging 132% over the last five years.

Just over half (52%) of Alberta exports to the country in 2001 consisted of wheat, including durum. Wheat sales grew 14% to \$39 million mainly because of higher prices, while durum wheat exports rose 21% to \$21 million for the same reason. Both these commodities have seen significant increases over the last five years, particularly durum wheat, which has more than doubled in value over this period.

Because Venezuela is a heavy producer of oil, equipment for the oil and gas fields, such as parts for boring or sinking machinery, pumps and compressors and machines with individual functions, make up over one-quarter of Alberta's exports to the country. Exports of these commodities have increased very strongly over the last five years.

Brazil

Exports to Brazil dropped 21% to \$94 million in 2001 because of substantially lower shipments of sulphur and coal. Canadian exports fell less dramatically, by 9.7% during the same year. As a result of the 2001 decline, Brazil moved down one spot to become Alberta's second largest market in South America, with 22% of the region's imports.

Sulphur and coal together make up 55% of the province's exports to the country. In 2001, sulphur exports fell 36% to \$30 million mostly because of lower volumes, while coal dropped 34% to \$22 million for the same reason. Over the last five years, sulphur shipments have been trending downwards, while coal exports have been climbing.

In 2001, oil and gas field and telecom equipment surfaced as major exports to Brazil. In particular, parts for boring or sinking machinery, rose to \$5.6 million in 2001, up sharply from almost nothing in 2000. Telecom equipment reached over \$9 million, an increase of about one-half from the previous year.

Alberta also sent \$7.2 million in aircraft parts to Brazil in 2001, a commodity not imported in the previous year.

Middle East

The Middle Eastern economy slowed only marginally in 2001, as strong crude oil prices provided a major boost in the face of declining oil production, weakening European markets and plunging tourism revenues.

In the Middle East overall exports were almost unchanged (+0.1%) from 2000 at \$426 million. Of this total, about one-half consisted of wheat shipments.

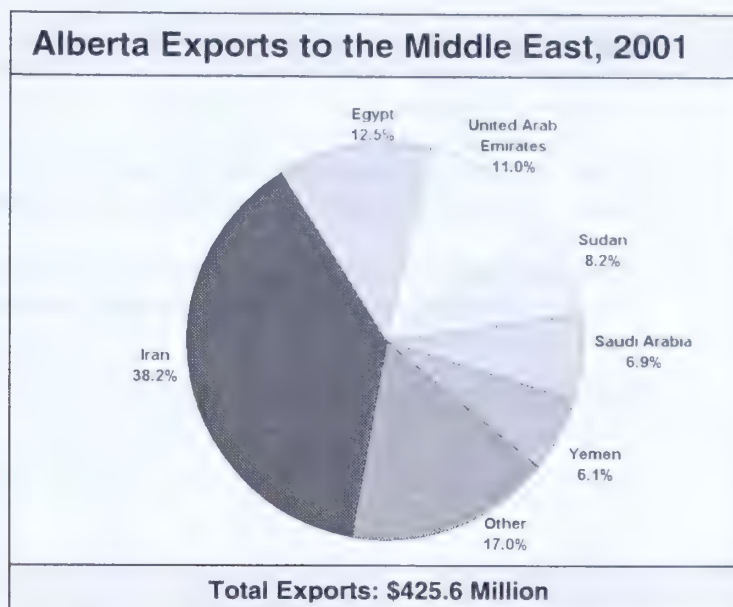

At the country level, exports to Egypt more than tripled to \$53 million because of a jump in wheat and coal shipments. In Sudan, exports surged more than six-fold, lifted by much stronger laboratory equipment and wheat exports. As a result, these countries became Alberta's second and fourth largest markets in the region, respectively.

These gains were large enough to offset lower exports to Alberta's largest market in the region - Iran. Mainly because of a steep drop in wheat prices, Iran spent 20% less on Alberta goods in 2001, but still accounted for 38% of the province's exports to the region. Egypt was responsible for another 13% of the Middle East's imports from Alberta in 2001, followed by the United Arab Emirates at 11% and Sudan at 8%.

Iran

Iran remained Alberta's ninth largest overall market in 2001, with exports valued at \$163 million. The province saw its Iranian sales drop 20%, mainly because of lower quantities of wheat shipped. By comparison, Canada's exports fell by an even larger rate of 27%. Of Alberta's top ten markets, Iran has the highest proportion of its Canadian imports coming from Alberta, at 34% in 2001.

Since 1997, a particularly strong year because of higher than normal shipments of wheat, Alberta exports to Iran have fallen 22%.

Wheat (non-durum) - valued at \$133 million in 2001 - accounted for 81% of exports to Iran, down from 94% in 2000. Exports of the commodity have dropped 28% in 2001 because of weaker volumes.

Other grains, although much less significant in value, were also exported to Iran in 2001. These included durum wheat, rising nearly three-fold to \$7.6 million during the year, and barley, up 14% to \$4.8 million.

Oil and gas field equipment exports made up the last major component of commodities sent to Iran. In particular, shipments of parts for boring or sinking machinery reached \$5.8 million, up strongly from \$0.4 million in 2000.

Africa

Africa escaped the global slowdown almost unscathed in 2001. The region maintained normal growth levels as higher crude oil prices and strong agricultural production made up for lower prices for such commodities as coffee, cotton and cocoa.

After rebounding slightly in 2000, Alberta exports to Africa – the province's third smallest regional market – were largely unchanged in 2001 at \$241 million.

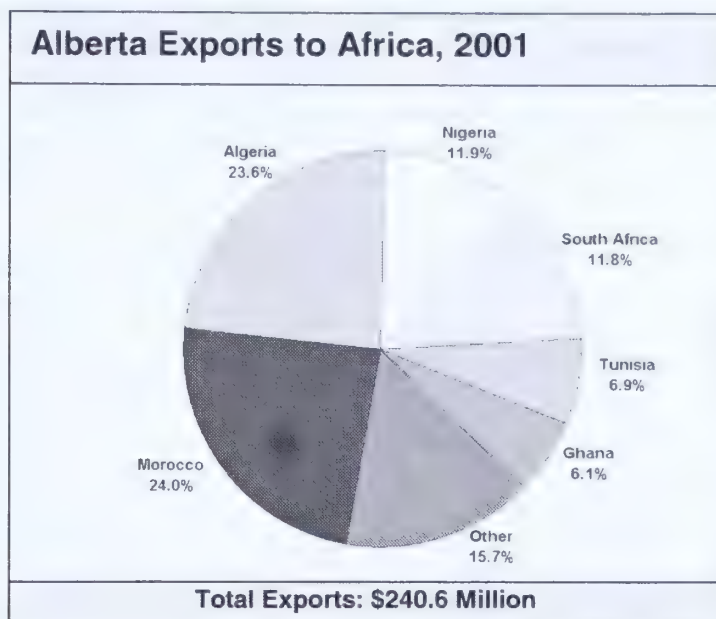

As in the Middle East, a large share (about two-thirds) of Alberta's shipments to Africa comes in the form of wheat, divided in roughly equal amounts between durum and non-durum.

Largely because of a sharp decline in sulphur exports, Africa has reduced its purchases of Alberta goods by 28% over the last five years.

A drop in durum wheat sales caused exports to Algeria to fall 33% to \$57 million in 2001, and allowed Morocco to become Alberta's largest market in the region for the first time since 1996, with exports totaling \$58 million. Combined, these two countries made up just under one-half of Alberta's exports to Africa.

Nigeria and South Africa were the third and fourth largest markets, each with about a 12% share in the province's African exports.

Morocco

Morocco was the largest market in the region for Alberta goods in 2001, with exports reaching \$58 million – a 9.6% increase from the previous year. Nationally, sales to the country advanced 5.4%.

Over the last five years, exports to Morocco dropped 40%, as climbing wheat sales could not make up for falling sulphur shipments.

Durum wheat makes up the majority of Alberta exports to Morocco. In 2001, 56% or \$32 million of the province's sales to the country was comprised of durum wheat, up 13% from the year prior. Exports of this commodity has steadily risen over the last five years and more than tripled over this period.

Almost all the remaining exports to Morocco involve wheat (non-durum) and sulphur, valued at \$16 million and \$8 million, respectively. Sulphur declined for the fifth straight year in 2001 (by 16%) while non-durum wheat gained 38%.

Algeria

Algeria took in 33% less in imports from Alberta in 2001 than it did in 2000, a sharp decline that resulted from lower quantities of durum wheat shipped. Canadian exports dropped by 40% over the same period.

At \$56.8 million, exports to Algeria were valued at almost half their 1997 levels, mainly because large amounts of non-durum wheat were exported five years ago, but not in 2001.

Similar to Morocco, Alberta's exports to Algeria depend almost entirely on wheat. Three-quarters of the shipments to the country in 2001 were comprised of durum wheat valued at \$43 million. Because of a decline in volumes, exports of the commodity plunged 43% in 2001, putting its value at 36% below 1997 levels.

Shipments of boring or sinking machinery for the oil and gas fields were valued at \$6.4 million, up strongly from \$0.3 million the previous year.

Eastern Europe

Strong productivity gains and market reforms have helped trigger Eastern Europe's strong economic performance in recent years. While the region's economic growth slowed slightly in 2001 because of weak western European markets, consumer and investment spending continued to post sizeable gains.

The province's exports to Eastern Europe powered ahead for the second straight year, climbing 18% to \$132 million in 2001. As a result of this growth, Eastern Europe was removed from its position as Alberta's smallest regional market for the first time since 1993.

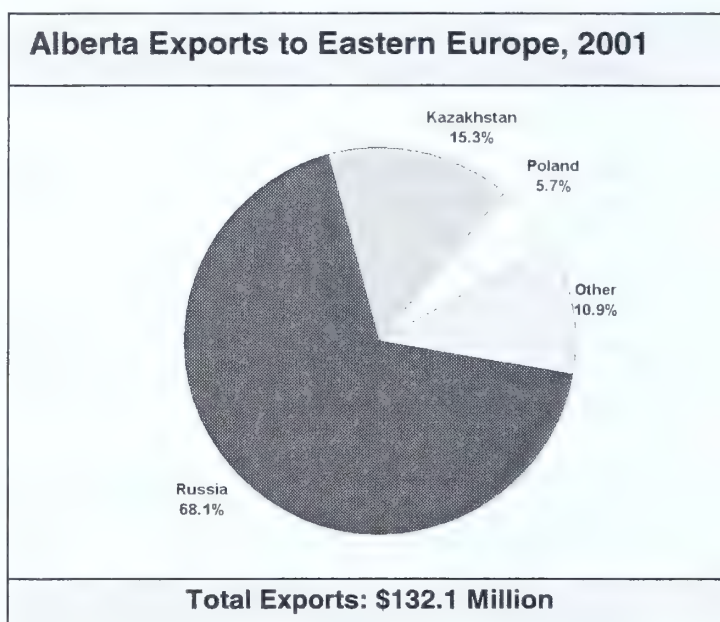

Eastern Europe has been Alberta's fastest growing regional market over the last five years (exports have nearly doubled), thanks to a surge in equipment sales, mostly oil and gas related.

Russia is the major market in the region and the major force behind Alberta's recent expansion in the region. The country accounts for 68% of Alberta exports followed by Kazakhstan with 15% and Poland at 6%.

Russia

Alberta exports to Russia expanded 45% to \$90 million in 2001, comparable to the 43% increase in Canadian exports. Russia imported just over two-thirds (68%) of all goods sent from Alberta to Eastern Europe.

Russia has doubled its imports of Alberta goods over the last five years, as a result of its growing purchases of oil and gas field equipment.

Machinery - most of which is oil and gas field equipment - is the largest category of shipments to the country. In 2001, strong gains were posted by the following top commodities: machines with individual functions valued at \$20 million (up from \$3.5 million), parts for machinery for the treatment of material involving a change in temperature totaling \$14 million (up from \$1 million), and parts for lifting and handling equipment reaching \$9 million (not exported in 2000).

Accounting for another 10% of exports, purchases of special purpose vehicles reached \$9 million in 2001, the first significant amount since 1993.

Beef and pork (\$4.2 million), telecom equipment (about \$3 million), and prefabricated buildings (\$1.5 million) were the next largest exports to Russia in 2001.

Oceania

Australia, New Zealand and other South Pacific countries makes up Oceania. The smallest market of all regions, Oceania imported \$92 million worth of Alberta goods in 2001 - a drop of 36% from \$145 million in 2000. This represents the largest one-year decline over the last ten years and was brought on by a 47% plunge in exports to Australia.

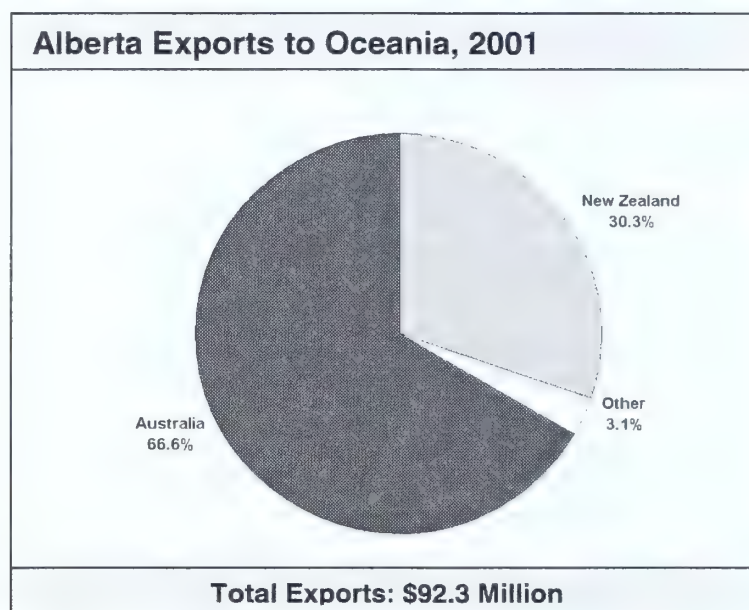

Alberta relies almost solely on Australia and New Zealand for exports. Combined, they make up 97% of all goods sent to the region. In 2001, New Zealand increased its share of regional exports to 30%, while Australia's share fell to two-thirds.

Because of declining sales to Australia, Alberta has seen its shipments to Oceania shrink by 47% over the last five years.

Australia

Despite a sharp reduction in 2001 exports, Australia remained Alberta's largest market in Oceania, making up two-thirds of sales to the region. In 2001, exports were down by 47% from the previous year - larger than the 16% decline in national exports - and by the same rate over the last five years.

Fueling most of the 2001 decline, was urea (fertilizer) and sulphur, which both dropped close to zero after being two of the largest exports in 2000. Telecom shipments also played a role, tumbling nearly 40% during the year.

In 2001, exports of telecom equipment – including parts for telephone line systems, switching equipment and telephones – had a value of \$24 million and accounted for 40% of the exports. Oil and gas field equipment, primarily pumps and compressors valued at \$5 million, made up the next largest category of exports.

Other top exports were plastics (\$3.6 million), artificial filament tow for cigarette filters (\$3.5 million), and frozen meat (\$1.5)

Exports from Canada

HS Code	Commodity Description	Canada 2000	Canada 2001
843143	Parts of boring or sinking machinery, whether or not self-propelled	\$18,240,348	\$19,535,641
100190	Wheat nes and meslin	\$0	\$3,964,671
843041	Boring or sinking machinery, self-propelled nes	\$3,486,055	\$2,330,515
480510	Paper, fluting (corrugating medium), in rolls, semi-chemical, uncoated	\$491,292	\$1,597,922
480411	Paper, kraftliner, in rolls, unbleached, uncoated	\$461,550	\$871,274
490700	Unused postage, check forms, banknotes, stock etc.	\$0	\$740,554
847990	Parts of machines & mechanical appliances nes, having individual functions	\$823,361	\$664,014
841199	Gas turbine parts nes	\$0	\$606,756
870510	Mobile cranes	\$1,679,108	\$535,150
870899	Parts and accessories of motor vehicles nes	\$3,024	\$466,205
TOTAL (Commodities Listed Above)		\$7,309,597	\$31,312,702
TOTAL (All Commodities)		\$18,240,348	\$34,858,453

Export Performance

	1997 \$'000	1998 \$'000	1999 \$'000	2000 \$'000	2001 \$'000
ALBERTA	\$1,726	\$2,093	\$2,824	\$15,418	\$25,933
CANADA	\$9,813	\$5,952	\$24,360	\$18,240	\$34,822

Alberta International Trade Review 2001

Appendices

Appendix A North American Industrial Classification System (NAICS) Codes included in Industry Groupings

AED Export Industry Groupings	NAICS Code	NAICS Industries
Agriculture		
Livestock	112	Animal Production
	1152	Support Activities for Animal Production
Crops	111	Crop Production
Primary Forestry, Fishing and Trapping		
	113	Forestry & Logging
	114	Fishing, Hunting and Trapping
Mining & Energy		
Crude Oil	211	Oil & Gas Extraction
Natural Gas & Natural Gas Liquids	211	Oil & Gas Extraction
Sulphur	211	Oil & Gas Extraction
Coal	21211	Coal Mining
Other Mining	212	Mining (except Oil & Gas)
Electricity	22111	Electric Power Generation
Manufacturing		
Food, Feed & Beverages	311	Food Manufacturing
	312	Beverage & Tobacco Product Manufacturing
Plastics	326	Plastics & Rubber Products Manufacturing
Wood Products	321	Wood Product Manufacturing
Furniture & Allied Products	337	Furniture & Related Product Manufacturing
Paper Products & Wood Pulp	322	Paper Manufacturing
Primary Metal Products	331	Primary Metal Manufacturing
Fabricated Metal Products	332	Fabricated Metal Product Manufacturing
Machinery	333	Machinery Manufacturing
Transportation Equipment	336	Transportation Equipment Manufacturing
Computer & Electronic Products	334	Computer/Electronic Product Manufacturing
Electrical Equipment, Appliances & Components	335	Electrical Equipment, Appliance & Component Manufacturing
Non-Metallic Mineral Products	327	Non-Metallic Mineral Product Manufacturing
Refined Petroleum & Coal Products	324	Petroleum & Coal Products Manufacturing
Chemicals	325	Chemical Manufacturing
Other Manufacturing	313	Textile Mills
	314	Textile Product Mills
	315	Clothing Manufacturing
	316	Leather & Allied Product Manufacturing
	323	Printing & Related Support Activities
	339	Miscellaneous Manufacturing
Other Exports	41511	New/Used Automob./Light Truck Wholesaler
	41512	Truck, Truck Tractor & Bus Wholesaler
	418	Recyclable Material Wholesaler-Distributors
	45331	Used Merchandise Stores
	45399	All Other Miscellaneous Store Retailers
	51113	Book Publishers
	51121	Software Publishers
	71151	Independent Artists, Writers & Performers
	81292	Photo Finishing Services

Note: Exports not manufactured in Alberta, e.g. medium/large aircraft, were re-allocated to **Other Exports**

Appendix B: Commodity Export Summary by Country, 1996 – 2001
